## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Turner (US PAT # 6,738,373).

Regarding claim 1, Turner teaches a method of controlling the operation mode of a hybrid access terminal (HAT) (see col. 4, lines 44-65) capable of communicating a first communication system that supports voice service and low-speed data service and a second communication system that supports high-speed data service (see col. 2, lines 5, lines 1-9), the method comprising the steps of: monitoring both the first and second communication systems in a hybrid operation mode by the HAT (col. 2, lines 58-64); and transitioning from the hybrid operation mode to a data-only operation mode (col. 5, lines 4-16), upon receipt of a message ordering mode transition from the second communication system (see col. 5, lines 25-32), discontinuing monitoring the first

communication system, and monitoring only the second communication system by the HAT.

Claims 10, 12-13 and 16-17 are rejected for the same reasons as discussed above with respect to claim 1.

For claims 2-3, 4-8, see col. 2, lines 37-63.

For claims 9, 11, 14-15 and 18-19, see col. 1, lines 14-54.
